

Homework No. 10 (Fall 2021)

PHYS 205B: University Physics

Due date: Tuesday, 2021 Nov 30, on D2L

Instructions

- Describe your thought process in detail and organize it clearly. Make sure your answer has the correct units and the right number of significant digits.
- After completion, scan the pages as a single PDF file, and submit the file on D2L (under Assessments → Assignments).

Problems

1. (10 points.) Light takes 8.0 minutes to travel from A to B . Determine the distance between A and B in light-years. Compare this to the distance between Sun and Earth.

Solution

2. (10 points.) The distance to the North Star, Polaris, is approximately 6.44×10^{18} m. If Polaris were to burn out today, how many years from now would we on Earth see it disappear?

Solution (Problems 1 and 2 are collected in a single video.)

3. (10 points.) Given $\alpha = 60.0^\circ$, in Figure 1. Find θ .

Figure 1: Problem 3

Solution

4. (10 points.) A 1.0 cm object is placed upright at a distance 10.0 cm away from a convex mirror. The mirror's focal length is 10.0 cm.
- (a) What is the radius of curvature of the mirror?
 - (b) Calculate the image distance.
 - (c) What is the magnification?
 - (d) Is the image real or virtual?
 - (e) Is the image inverted or upright?
 - (f) Determine the height of the image.
 - (g) Confirm your results by drawing a ray diagram for the above case. Choose the scale for the two relevant directions appropriately so that the relevant features are illustrated well. Points will be awarded for clarity and accuracy.

Solution

5. (10 points.) A 1.0 cm object is placed upright at a distance 5.0 cm away from a concave mirror. The mirror's focal length is 10.0 cm.
- (a) What is the mirror's radius of curvature?
 - (b) Calculate the image distance.
 - (c) What is the magnification?
 - (d) Is the image real or virtual?
 - (e) Is the image inverted or upright?
 - (f) Determine the height of the image.
 - (g) Confirm your results by drawing a ray diagram for the above case. Choose the scale for the two relevant directions appropriately so that the relevant features are illustrated well. Points will be awarded for clarity and accuracy.

Solution
